Ricochet is an interesting cat-and-mouse game. The goal is to make your cat don't get shot, in a certain period of time. To do this, you have to touch the enemies (on the screen) as fast as possible. You are standing in a wide open space filled with transparent black. Your task is to avoid the environment and shoot at enemies that accidentally appear on the playing field. You have a gun and ammo that never run out. You can pick up extra ammo from enemies that are killed. You can only pick up ammo while standing on them, on top of them or under them. Your speed increases in the moment you pick up ammo. A 1st hit is usually a direct hit on an enemy, if you don't kill them, the game ends. 2nd hit kills an enemy, if you don't kill it, the game ends. If you see ammo, ammo will not run out. If you pick up ammo while you're moving, you're going faster. There is no limit for the number of kills you can get, but the better your luck, the more ammo you pick up. You can pick up ammo more often by picking up more enemies. You get a maximum of 2 lives, the game ends if you run out. Each enemy reacts to being shot differently, some will remain inactive, other will hide, other will move around etc. It's possible to hide, shoot and run around, with a maximum amount of time running around. There are different weapons, with different ammo types (round/x bullets), and different reload times. You can check your life by touching the life meter at the lower right of the screen. There are enemies that have a different color, and when you kill them, they drop a particular ammo type. You can see statistics for each enemy and weapon. There are levels with hidden ammo. Levels in order of difficulty. If you successfully kill an enemy, that particular ammo type is not dropped. Challenge levels. There is a counter, which increases by each successful kill. Appearing enemies are different in the mode "3 Lives". For example, you don't have to hide while shooting at them. If you don't kill an enemy, you have to restart the level. The game also has a secret level and a speed mode (game used to be very slow, but it was patched a
